Brenda Raker Appointed Chief Executive Officer of U.S. Operations for Fourier Systems

NEW ALBANY, IND. (March 7, 2007) – Fourier Systems, Ltd., a global provider of science and 1:1 computing solutions for the education market, has named Brenda Raker as Chief Executive Officer of U.S. Operations. Raker will oversee strategic goals, operations, product development and marketing, in conjunction with the Israel-based executive branch.

Most recently, Raker served as president of The Greaves Group, where she provided C-level consulting to top-tier educational technology companies, including Fourier Systems. Working with the Israel team, she helped launch the company's 1:1 computing solution, the Nova5000.

Raker will report to Dov Bruker, CEO of Fourier Systems, Ltd., and direct all U.S. operations from the company's new U.S. headquarters in Indiana. "As a consultant, Brenda Raker provided us with the energy and confidence we needed to break into the American market," said Bruker. "With her experience as an educator, technology-expert and industry consultant, we know she will provide strong leadership and thoughtful, strategic planning. We are proud to have her as a new team leader."

Previously, Raker served in several top-level management positions for education-focused companies, including Corporate Development and Capital, Educational Resources, The Learning Company, Science Applications International Corporation, BDM International, Inc., and Apple Computer, Inc. Earlier in her career as the director of the Wilson Education Center, she implemented and managed one of three Indiana-based pilot training centers that provided technology support to 35 school districts.

Raker began her career in education, teaching middle school history and mathematics for 12 years. She has a bachelor's and master's degree from Ball State University, and a computer education endorsement from Purdue University.
