Fourier Partners with Texas Regional Collaboratives

AUSTIN, TEXAS (Dec. 9, 2005) – Following a grant from the Texas Education Agency, the Texas Regional Collaboratives (TRC) for Excellence in Science Teaching has initiated a teacher training model that includes a partnership with Fourier Systems. Because the state's specific goal is to raise student achievement in earth science, Fourier Systems has provided the TRC with special training on its pocket-sized *EcoLogXL* data logger, which allows elementary students to instantly measure and record environmental data.

Fourier has supplied each of the 34 collaboratives with its own *EcoLogXL* bundle so that teachers can immediately use the equipment to teach scientific concepts to their students. In addition to the products already donated, Fourier plans to continue its partnership with the TRC by sponsoring TAKS training and offering significantly discounted science equipment.

About Fourier Systems, Inc.

Established in 1989, Fourier is a world leader in the manufacture and distribution of compact portable data logging devices and accessories for the education market. The company's science kits continue to push the standards of science education higher, now in over 30 countries around the world. With the wide range of sensors, user-friendly software and relevant curriculum material, Fourier's products demonstrate a commitment to high quality. Fourier has earned accolades both nationally and internationally, including the Worlddidac award for the *EcoLog*[™] and *ExperiNet*[™]. For more information, visit www.fourier-sys.com or phone 866-352-6994.
