

GradeCam™ FAQs

There is no way to collect student performance data that is more convenient or less expensive than *GradeCam*. *GradeCam* is proprietary software that works with a web or document camera to grade multiple-choice tests. It provides teachers with instant statistics and reports so they have the information they need to identify gaps in student understanding and adjust instruction for better outcomes. Because it is used in the classroom, *GradeCam* gives both teachers and students this information when and where they need it.

GradeCam was developed through several years of collaboration with technology experts experienced in designing productivity tools. This easy-to-use image recognition software saves time by automating the stressful tasks of grading multiple-choice assignments and recording scores. *GradeCam* works with all electronic grade books and greatly reduces the time it takes to keep student information current. This is especially important for teachers who give parents timely access to grades by posting them online.

Where did *GradeCam* come from?

GradeCam came directly out of the classroom experience of two educators, Tami and Rick Porter. They worked with a team of computer programmers led by their son Robert to develop *GradeCam*, and put it through extensive field testing.

Can I use *GradeCam* with my electronic grade book?

GradeCam can be used with *all* electronic grade book programs, including those that are web-based.

How does *GradeCam* work?

GradeCam reads bubble forms directly, grading tests of up to 100 questions in seconds, and recording scores immediately in any electronic grade book.

Can I use *GradeCam* with my existing document camera?

GradeCam software works with many document cameras and will soon work with many more. Call 866-472-3339 to find out if it will work with your document camera.

How do I use the information from *GradeCam*?

GradeCam provides teacher and student with specific, actionable metrics to guide instruction adjustment to improve student outcomes.

MORE

Does *GradeCam* correlate to my state’s standards?

GradeCam allows educators to align each test item to a state standard, giving administrators an effective tool for monitoring both the teaching of their state’s standards, and student progress toward meeting those standards.

What kinds of reports can I generate with *GradeCam*?

GradeCam offers a multitude of reports to inform data-driven decision-making. The software provides information at the item, student, and class level. All the reports are available immediately after the tests have been scanned. These include item analysis, assignment statistics, student test results, and standards reports.

Do students need to use special pens to fill in the forms?

No. Students can use a regular pen or pencil to fill in the forms.

Is technical support available?

All subscriptions to *GradeCam Online* include technical support.
