

# GradeCam introduces a web-based, low-cost software alternative to mechanical test scoring machines

## PLACE STUDENT WORK UNDER A CAMERA TO:

- Grade multiple-choice tests with up to 100 questions
- Instantly enter test results into the grade book you use now
- Get instant item analysis and other statistics for true short-cycle formative assessments
- Generate reports to monitor student understanding and provide feedback
- Track student progress towards your state's standards
- Post graded papers and points for credit/no credit assignments in seconds
- Increase student involvement and accountability
- Keep your current electronic grade book continually up to date
- Save hours every week

## WITH GRADECAM YOU CAN ALSO:

- Generate your own reproducible forms with or without student IDs already bubbled

## WHY GRADECAM?

- Because it is software instead of hardware and has no mechanical parts, GradeCam costs a fraction of the price of old scanning technology. It is also faster and more reliable than mechanical scanning technology.
- GradeCam forms are reproducible, so not only is its initial cost affordable, it continues to be affordable.
- GradeCam's affordability means it can be used in the only place data-driven decisions truly impact learning—the classroom. Hundreds of studies have shown that frequently assessing

students and using information from those assessments to shape instruction has a dramatic effect on learning.

- GradeCam is a tremendous tool for teaching state standards and for differentiating instruction. Of course, that also means that GradeCam is a tremendous tool for raising test scores.
- GradeCam's credit/no credit feature identifies and records who has and who has not turned in homework moments after class has started.
- GradeCam gives teachers a way to track all classroom paperwork. Other data collection scanners are used only for tests.
- GradeCam works with all electronic grade books and will work with yours whether it is network-based, web-based, or stand-alone.
- GradeCam alleviates the work and stress associated with keeping an online grade book current.

**Can I reproduce GradeCam forms?** Yes. GradeCam includes a form generator that allows you to create and print your own forms and you can make as many copies as you need.

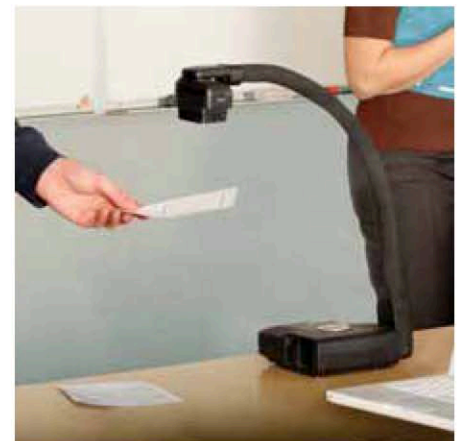

**Will GradeCam work with my electronic grade book?** Yes. GradeCam works with all electronic grade books.

**Will GradeCam work with the document camera I already own?** GradeCam works with many document cameras. Call 866-472-3339 to find out if it will work with yours.

**Do students need to use special pens to bubble?** No. Students can use pen or pencil.

GradeCam camera kits are \$98 each.

GradeCam also works with many document cameras.

**How does GradeCam work?** Once the form students used to mark their answer choices is placed under a camera, GradeCam's artificial intelligence technology finds and compares the answers chosen with the answer key. It then sends the results to your grade book. Item-by-item results are stored within GradeCam for generating both real-time reports and any reports needed in the future. ■
